### Important Notes:

This chart indicates assessments required by Even Start based on the age of the child. For PALS Pre-K & PPVT age is determined as of Sept. 1. In some cases, programs may select between various assessments. These are noted in vertical columns with "OR."

Programs are required to administer more than one assessment to children in only two instances: when children are newly enrolled 3 yr. olds & when children are 4 yrs. old. Programs MAY choose to administer additional assessments. Note that optional administration of assessments would be for program use only. TESPIRS will not record these additional assessments.
